

Liquid Fertilizer Tanks

A.G.I. 
envirotank

AGI Envirotank manufactures quality storage solutions for Liquid Fertilizer. AGI gives our clients choices. We build both carbon and stainless steel storage tanks. We build our tanks Bigger in Biggar. AGI can shop build tanks up to 300,000 Imp gallons. For tanks larger than this we can send an experienced crew to field erect your tank.

Standard Features

- Professionally engineered storage tanks
- Side manways
- Correctly sized vents
- Fill and discharge couplers
- Site tube gauges

Optional Features

- Ladders and cages
- Valve packages

Carbon Steel Tanks

Carbon steel tanks manufactured by AGI have many advantages when used to store liquid fertilizer.

- Carbon steel tanks are inexpensive methods of storage.
- Carbon steel tanks can be long term storage solutions when combined with a properly applied internal epoxy.
- Carbon steel tanks are designed to API codes.

Stainless Steel Storage Tanks

Stainless steel tanks manufactured by AGI have many advantages when used to store liquid fertilizer.

- Stainless steel is corrosion resistant.
- Stainless steel does not need to be painted on the exterior of the tank.
- Stainless steel does not require an internal lining that needs to be inspected.
